SUMMARY

Full-Stack Developer with hands-on experience building and deploying scalable web applications using React.js, Node.js, Express.js, and MongoDB. Skilled in developing responsive user interfaces, RESTful APIs, authentication systems, and database-driven applications with a strong focus on clean architecture and performance optimization. Built production-ready projects including an e-commerce platform, stock tracking application, and spa booking system with real-world deployment experience. Passionate about building scalable software products and solving real-world engineering problems.

EXPERIENCE

The Upscalers

July 2025 – Jan 2026

Full-Stack Developer Intern | Live Demo | GitHub

Kolkata, India

- Developed and deployed a fully responsive spa service website using HTML, CSS, and JavaScript with a mobile-first design approach.
- Built RESTful APIs using Node.js and Express.js, and integrated MongoDB for managing booking data and customer records.
- Integrated a WhatsApp-based communication system for automated booking confirmations and customer interactions.
- Optimized frontend performance, improved responsiveness, and resolved cross-device compatibility issues to enhance overall user experience.
- Implemented reusable UI components, animated service sections, and interactive layouts for a modern and engaging interface.

PROJECTS

Krazy-For-Nuts | React.js, Firebase | Live Demo | GitHub

- Developed a full-stack e-commerce platform using React.js and Firebase with secure authentication and real-time database integration.
- Implemented dynamic product catalog, cart management system, and order tracking functionality for a seamless shopping experience.
- Designed reusable and modular UI components while ensuring responsive layouts across desktop and mobile devices.
- Optimized state management and minimized unnecessary re-renders to improve frontend performance and scalability.

Stock Watchlist Lite | React, Vite, Vitest | Live Demo | GitHub

- Built a lightweight stock tracking application using React and Vite with a modular component-based architecture.
- Implemented search, sorting, and detailed stock views with proper state management and error handling.
- Designed reusable UI components and optimized rendering performance to reduce unnecessary re-renders.
- Wrote unit tests using Vitest and React Testing Library to improve component reliability and maintainability.
- Handled edge cases such as invalid search queries and empty API responses to improve user experience.

Portfolio Website | React, Vite, Tailwind CSS, EmailJS | Live Demo | GitHub

- Designed and developed a responsive portfolio website showcasing technical projects, skills, and professional experience.
- Implemented interactive UI features including animations, 3D skill cards, and smooth scrolling navigation.
- Integrated EmailJS contact functionality to allow recruiters and clients to connect directly through the website.
- Optimized accessibility, responsiveness, and Lighthouse performance scores for improved SEO and user experience.

EDUCATION

University of Engineering & Management, Kolkata

Bachelor of Technology in Computer Science and Technology

July 2020 – July 2024

CGPA: 8.2 / 10

SKILLS

Programming Languages: HTML, CSS, JavaScript, Java, C++

Frameworks & Libraries: React.js, Next.js, Angular, Node.js, Express.js

Databases: MySQL, MongoDB

Developer Tools: Git, GitHub, VS Code, Postman, Firebase
