Summary

Full-Stack Developer with experience developing scalable web applications using React, Node.js, and MongoDB. Built and deployed production-ready applications with authentication, booking systems, and performance optimization. Seeking an SDE-1 role to contribute to impactful products.

Experience

The Upscalers | SpaRituals | GitHub

July 2025 – Present

Full-Stack Developer Intern

Kolkata, India

- Developed and deployed a fully responsive spa service website using HTML, CSS, and JavaScript with a mobile-first design approach, improving user engagement.
- Built RESTful APIs using Node.js and Express, and integrated MongoDB for managing booking data and customer records.
- Integrated WhatsApp-based communication system for automated booking confirmations and customer interaction.
- Optimized frontend performance by reducing load time and resolving cross-device compatibility issues.

Projects

Krazy-For-Nuts | React.js, Firebase | Live Demo | GitHub

- Developed a full-stack e-commerce platform using React.js and Firebase with secure authentication and real-time database integration.
- Implemented dynamic product catalog, cart management system, and order tracking functionality.
- Designed reusable and modular UI components ensuring responsive layouts across devices.
- Optimized state management and reduced unnecessary re-renders to improve performance.

Stock Watchlist Lite | React, Vite, Vitest | Live Demo | GitHub

- Built a lightweight stock tracking application using React and Vite with modular component architecture.
- Implemented search, sorting, and detailed stock views with proper state management and error handling.
- Designed reusable components and optimized rendering performance to reduce unnecessary re-renders.

Education

University of Engineering & Management, Kolkata

July 2020 – July 2024

B.Tech in Computer Science and Technology

CGPA: 8.2 / 10

Skills
